---

It is my understanding that data doesn't necessarily have to be generated using only CLP methods to be reliable for listing purposes. But I don't want to go too far into analytical data documentation territory as that is not my area of expertise. I will get the data to the data specialist as soon as possible. Thanks.

Katharine Lima

Look for a data directory in the Upper Animas and such folder. It may take another few minutes to upload, but should get there today. If CSC determines that we did not use CLP analytical methods with the ESAT work, what then?
